

China Electric Power Industry Report, 2007

Thursday, 28 June 2007

Name of report

China Electric Power Industry Report, 2007

CBI report code

14010003

Publishing date

Jun-07

Pages (approx)

22

Price

USD 349.00 or AUD (inc GST) 450.00

Delivery

Email (PDF format)

Delivery time

Up to 10 working days on receipt of payment, depending on your specific orders

LIST OF CONTENTS

In 2006, the amount of generated electricity nationwide achieved 2.86 trillion KWh with the year-on-year increase of

13.5%, among which the generated hydropower achieved 416.7 billion KWh with year-on-year increase of 5.1%; generated thermal power 2.3573 trillion KWh with year-on-year increase of 15.3%; nuclear power 54.3 billion KWh with year-on-year increase of 2.4%.

1 Performance of Power Industry, H1 2007

2 Extensive Investment is the direct driving factor of industry performance

3 Analysis of Industrial Operation in 2006

4 Analysis of Uneven Water Source in Hydropower Industry and Growth Anticipation

5 Analysis of Q1 2007: Coal Prices Increased and Growth Rate of Industrial Benefits Slowed Down

6 Analysis on Demand-Supply Situation in Q1 2007

7 Supply and Demand Situation: Demand and Supply Lessened Gradually and Production Capacity Released Orderly

8 Industrial Structure: Accelerating Adjustment and Optimization, Improving Asset Quality

9 Evaluation and Profitability: reasonable Evaluation and Stimulated Factors Are Required for Profit Rising

10 Interest Rate: Entering Interest Rising Period and Financial Costs Increasing

11 Brief Introductions of Main Listed Electric Power Enterprises
